

## **Work With Gallery Files**

This screen is used to associate .jpeg or .jpg files on the PC with the selected gallery.

### **Add File From PC**

Opens standard Windows dialog for selecting files.

Selected file names will be displayed in the name list.

Only .jpeg and .jpg files are allowed to be added to the list.

Selecting a file does not add the file to the Netgear Meural server.

### **Remove File From Gallery**

Removes highlighted files from the gallery and from the Netgear Meural server.

### **Display File**

Displays highlighted files. Multiple files can be highlighted.

### **Send All Files to Gallery on Server**

Sends all files in the list that are not yet on the server, to the server.

### **Send Gallery to Canvas**

Sends gallery to the Canvas.

### **Remove Gallery from Canvas**

Removes gallery from the Canvas.

### **Save Names of Files Not on Server**

The names of all listed files not yet on the server are saved under the name of this Gallery.

Replaces any prior saved names list created for this Gallery.

### **Load Local Files Per Saved List**

Files named in the “saved names” list for this Gallery are associated with this Gallery.

The loaded file names will be displayed in the name list.

These files are not yet on the Netgear Meural server.

### **Leave**
