Gallery Garden

Overall purpose of the tool

- Move photos (.jpeg or .jpg) from PC to a Gallery on the Netgear Meural server.
- Move Galleries from the Netgear Meural server to and from the Canvas.

Gallery Garden screen

Lists the Galleries that are on the Netgear Meural server.

For each listed Gallery

- Number of photos in the Gallery
- Whether or not Gallery is on Canvas
- Other useful info

Create Gallery On Server

Opens a screen where a new Gallery can be created on the server.

Work With Gallery Files

Opens a screen for managing the files in the selected Gallery.

Before clicking this button one and ONLY one Gallery must be selected from the list.

Double clicking the target Gallery opens the Work With Gallery Files screen.

Delete Gallery From Server

Removes the highlighted Galleries and the files in these Galleries from the Netgear server.

Highlighted Galleries will be removed from Canvas too.

Send Gallery To Canvas

Sends highlighted Galleries to the Canvas.

Remove Gallery From Canvas

Removes highlighted Galleries from the Canvas.

User Files Workbench

Opens a screen for managing all files on the Netgear server for the user account that was logged into.

Leave

Close this screen.
